

Durapac CB1250 Static Compactor

The Durapac CB1250SS is specifically designed for sites where floorspace is at a premium. Designed and manufactured to compact medium to high volumes of dry or mixed waste and recyclable materials. It is ideal for hospitality and hotels, retailers, hospitals, shopping centres and local authorities as well as industrial and commercial premises, etc.

The controls are simple, and contained within a locking, vandal-proof cabinet. When full, the container connected to the CB1250SS is collected, emptied and returned by a roll-on-off vehicle.

Loading can be by hand, forklift tip skip, automatic bin lift for 240-1100 litre wheelie bins, chute, conveyor, air extraction system, from ground or dock level, using a choice of open or enclosed safety hoppers and interlocked doors, etc.

Full telemetry and remote access are standard which allow us to quickly help if you have a service problem and enables the machine to message your collection partner as it becomes full, saving transport costs and reducing your carbon footprint.

- Reduce waste disposal costs
- Improve site safety
- Save time, labour and space
- Cut Co2 emissions and environmental impact

CB1250SS SPECIFICATION	DETAIL
Charge Box Volume	1.65m ³
Motor Size (Kw)	7.5/11
Cycle Time (Secs)	45s
Power Supply	415V 3 Phase
Running Pressure (PSI)	1600
Penetration Into Container (mm)	425
Machine Weight (Kg)	2000
Clear Top Opening WxL (mm)	1500x1150
Ram Bore / Ram Stroke (mm)	125/1600
Compaction Force (Tonne)	25
Boost Pressure (PSI)	2000
Length (mm)	2200
Width (mm)	1950
Height (mm)	1400
Head Face Area (m ²)	1.08
